Open-Ended Responses

1. In what ways did your instructor make learning possible for you during the Fall 2024 semester?

Comments
Overall, Andrew Paul was a good instructor. When we asked him questions, he tried his best to answer the. However, there was no structure to this class, and every time he would guess what we were doing in class and wouldn't be prepared beforehand.
He explained ideas thoroughly from simple foundations to the complexities of Calc 3.
He went over class concepts and went over each recitation worksheet. He answered questions to the best of his ability.
He was a good TA.
I appreciated how he spoke on what he was doing at every point of the solving process. This allowed us to see the work but also understand the thought process for us to get there.
Explained problems and any questions very well, making sure we understood the content before moving on.
He was very good at walking us through practice problems and explaining the steps he took to solve problems

2. Which aspects of this course should be kept for future times this course is taught?

Comments
The reviews that the TAs write should be kept as they are extremely helpful however the class has to have more structure. There were concepts that we needed to learn that we weren't taught on time and now we're forced to learn them by ourselves.
I think I would change the layout of the course. Every week there is recitation worksheets. Instead of having us work on them and he'll answer lingering questions, he just did certain ones on the board. He also didn't print out the worksheets for us which was kind of inconvenient. I would have just had us work on the worksheet and then answer individual questions because then we could get more practice in. Sometimes it felt like we were just listening to him talk about the content rather than solving it ourselves.
I liked how we didn't have to do quizzes and stuff during this time. that was cool. What we had to learn in there was not at all difficult and was always fairly applicable.
The practice questions given were very helpful and they allowed us to address our weak points or gaps in knowledge.
The mix of self-work and guided work was very nice, I enjoyed having those different types of learning.
The flexible format was great because it allowed us to choose what we wanted to cover

Department Specific

If you would recommend this Instructor for a teaching award, please briefly explain why.

Comments
I would recommend Professor McLaughlin as mentioned in my previous review, however, I would not recommend Andrew Paul.
He was a Cool dude.
He seemed to truly understand every concept we covered, often making visuals and writing out in words what a concept really meant. I feel like it was easy to grasp the information that he taught because of this. Also, he was very professional and understanding.
